Questions?

As residents returned to their homes yesterday, questions arose regarding debris found in homes and on property. The event at Port Neches Operations on Wednesday resulted in pieces of process equipment being projected beyond the fence-line. Some of these pieces included asbestos insulation. Over the past 72 hours, TPC's contractor, CTEH, has conducted air sampling surrounding the event site. Air sampling continues to verify no measurable concentrations of airborne asbestos fibers. Given the nature of asbestos, we have urged people not to try to attempt to clean up the debris themselves.

TPC Group has engaged CTEH, environmental response specialists, to (already mentions the contractor, now mentions the contractor is engaged to...???) conduct the assessments and lead (lead removal, as in Pb?, or will be leading the effort to remove the asbestos debris?) removal efforts. Specialists will be assessing homes and yards within approximately one-half mile of the TPC Port Neches Operations fence-line. Please be aware that the clean up specialists are required to wear protective clothing (white Tyvek suits and respirators) to remove the asbestos debris. We expect assessments and clean up to begin immediately.
